Simply the best rifle bullet made. Period.

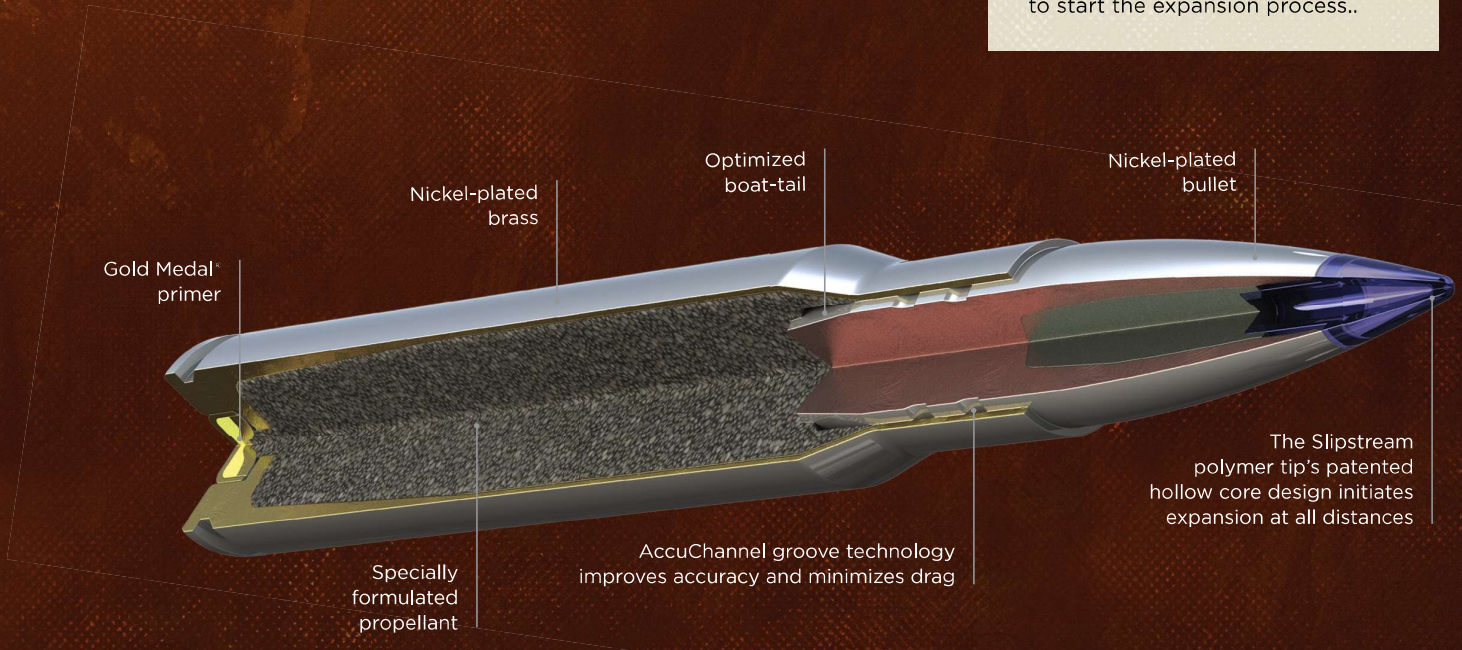

TERMINAL ASCENT NEW

Any hunt. Any range. Go beyond what you ever thought possible with new Federal Premium® Terminal Ascent™. Bonded construction penetrates deep on close targets, while the patented Slipstream® polymer tip initiates expansion at velocities 200 fps lower than comparable designs. The bullet's long, sleek profile offers an extremely high ballistic coefficient, and its AccuChannel® groove technology improves accuracy and minimizes drag. ***Now available in a full selection of long-range hunting cartridges.***

Slipstream's Secret

The Slipstream tip provides a perfectly aerodynamic meplat, yet initiates expansion at 200 fps lower velocities than comparable bullets. The secret is its hollow core, which is exposed when the tip breaks off on impact, allowing target material into the bullet nose to start the expansion process..

"Wide open country, long shots and stiff winds don't have a thing on Terminal Ascent. Nothing shoots like this."

- 22plinkster

1,200-Yard Performance
The Terminal Ascent's Slipstream polymer tip ensures proper expansion during low-velocity impact at extreme distances. In this ballistics gel block, shot at 1,200-yard velocity with P300WSMTA1, you can see where the Slipstream tip has initiated expansion and separated from the bullet immediately after entering the block, exactly as designed.

Penetration: Deep
Weight Retention: Maximum
Expansion: Controlled
Range: Maximum

"Terminal Ascent hits bucks hard. It's without a doubt the best bullet I've ever shot."

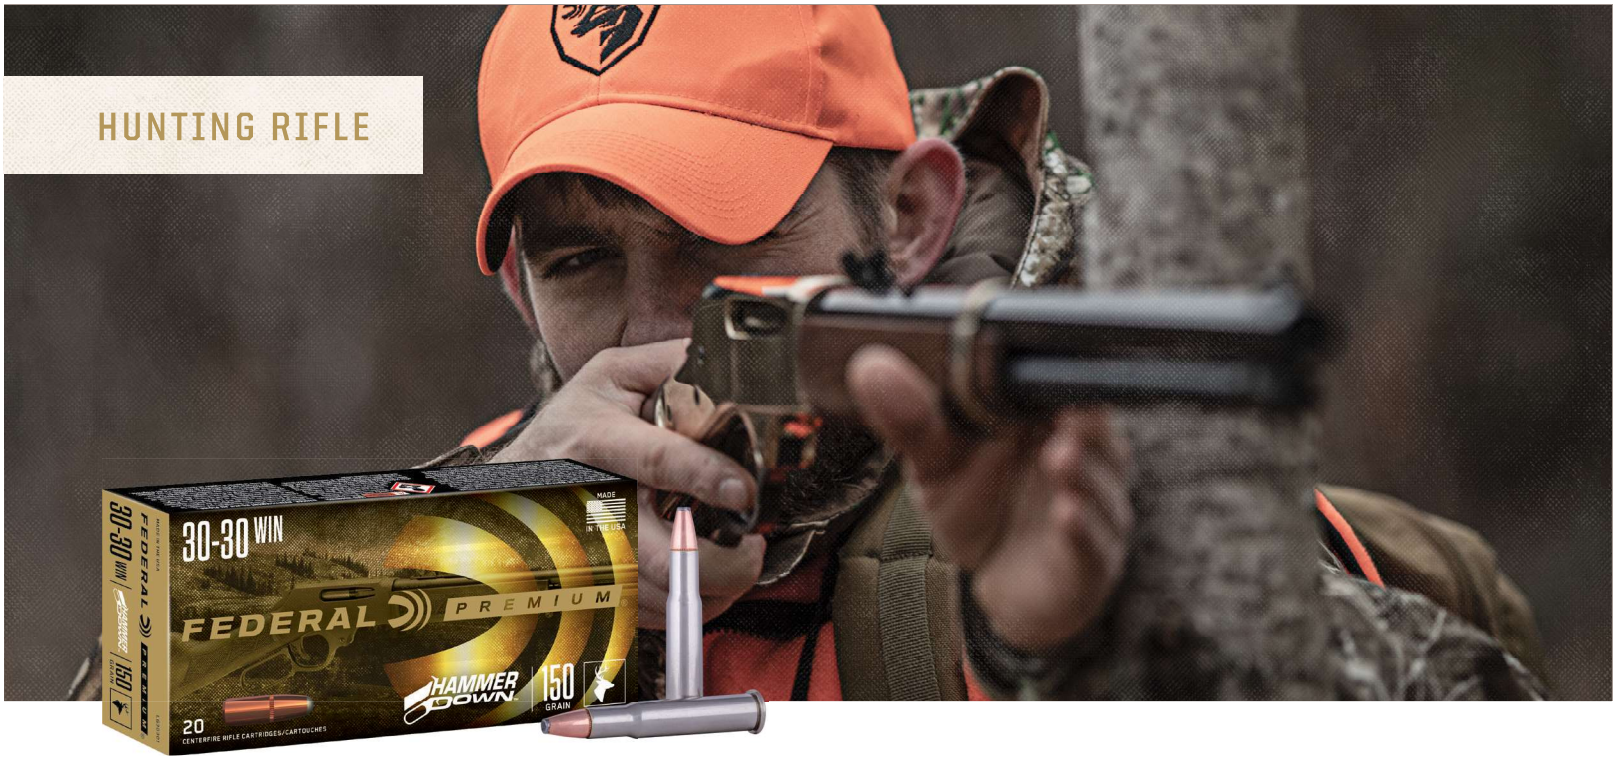

Sportswoman Courtney

Bullet upsets captured from 200-grain 300 Win. Magnum load, P300WTA1

Expansion Redefined: Lethal extreme-range bullet performance doesn't look like the 2x expansion hunters see at conventional distances—it's not supposed to. With petals that open instantly and peel back uniformly every time, the Terminal Ascent transfers more energy to the animal on impact and carves straight, deadly wound channels at all velocities.

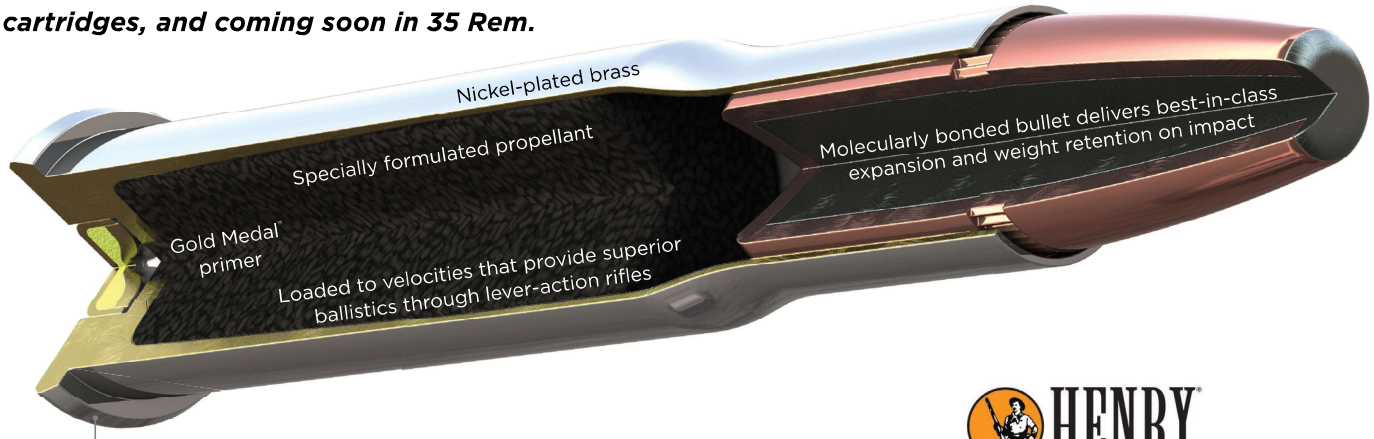

FOR A FULL LIST OF AVAILABLE LOADS AND BALLISTICS, REFER TO PAGES 19-28.

HAMMERDOWN

NEW

Make your lever-gun run like never before with the industry's only ammunition truly designed for optimal cycling and overall performance from the time-tested rifle platform. Velocities of all-new Federal Premium® HammerDown™ loads are customized to produce superior ballistics and terminal performance through lever-action barrel lengths. The construction of the molecularly bonded soft point bullets has also been adjusted for the best accuracy and expansion at those velocities. The geometry of each round's case, bullet and cartridge ensures flawless cycling through tubular magazine and typical lever-action feeding systems. ***Now available in a full line of the most popular lever-action cartridges, and coming soon in 35 Rem.***

Specialized patent-pending geometry improves cycling and doesn't hang up in tubular magazines and lever-action feeding systems

The Ultimate Leverage

Whether you're putting your lever-gun to work on bucks, bulls or boars, HammerDown's molecularly bonded bullets are optimized for terminal performance through lever-action barrel lengths.

HENRY®

When you set out to build the best lever-action rifle ammunition, you go to the industry's leading lever-gun manufacturer. Federal is proud to have partnered with Henry Repeating Arms when developing HammerDown. Their insight into the classic firearm platform helped ensure the utmost reliability and accuracy from each and every load.

RMEF

MEATEATER

LEAD FREE BULLET

TROPHY BONDED TIP

Surgical accuracy. Terminal results. Trophy Bonded® Tip combines bonded construction and a bone-crushing solid copper shank with a boat-tail design and polymer tip that reduce wind resistance. The resulting toughness and accuracy make it a perfect choice for the full spectrum of medium and big game.

TROPHY COPPER NEW

Pinpoint precision and almost 100 percent weight retention have made Trophy® Copper the official ammunition of MeatEater. All loads in the line provide extreme accuracy and aggressive expansion. ***Now available in 280 Ackley Improved.***

NOSLER BALLISTIC TIP

Hunters demand accuracy and versatility, and Nosler® Ballistic Tip® delivers. Its polymer tip and boat-tail design maximize downrange velocity and energy, while the tapered jacket provides fast, yet controlled, expansion. It's perfect for medium game at all ranges.

TROPHY BONDED BEAR CLAW

The world's toughest game calls for its toughest bullet. A bonded jacket and core that retain more than 95 percent of the bullet's weight for deep penetration. The design's grooved shank improves accuracy across all rifle platforms. ***Available in several loads with heavy-for-caliber bullets.***

NOSLER PARTITION

The Nosler® Partition® was the first bullet loaded in the Federal Premium® line, and it continues to be a standard for consistency and reliability. Its partitioned lead core allows the front half of the bullet to mushroom on impact, but keeps the back half intact for deep penetration.

NOSLER ACCUBOND

Shrink long distances down to size. Nosler® AccuBond® rifle loads' proven bullet design pairs a precision polymer tip with a highly concentric jacket bonded to a lead core. The result is fast expansion, moderate weight retention and lethal penetration.

FOR A FULL LIST OF AVAILABLE LOADS AND BALLISTICS, REFER TO PAGES 19-28.

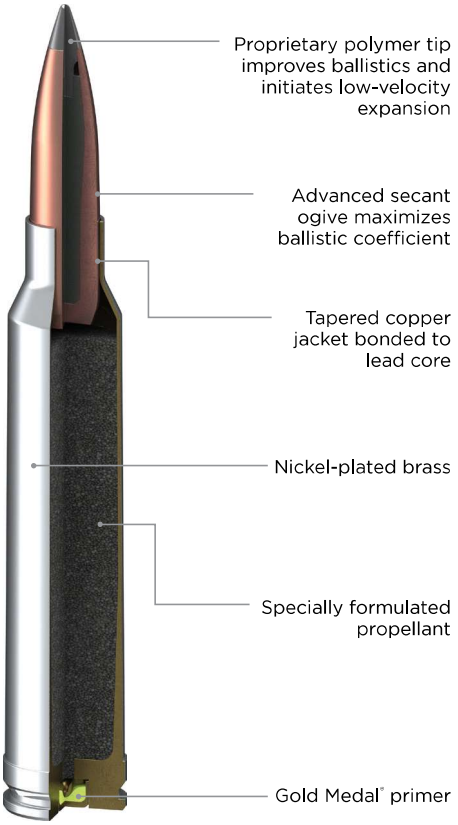

All-Range Reality
The Swift Scirocco II uses a precise polymer tip to improve ballistics and initiate low-velocity expansion at long distances, while its bonded copper jacket maintains weight on close-range hits.

SWIFT SCIROCCO II

NEW

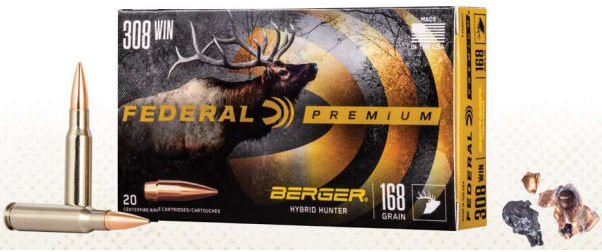

Push effective range to new extremes while delivering a more lethal blow on impact with Federal Premium® Swift® Scirocco® II loads. The polymer-tipped bullet's streamlined design and high ballistic coefficient produce flat trajectories, while retaining more velocity and energy downrange. Aided by its polymer tip, the bonded Scirocco II expands at minimal velocities yet offers high weight retention at close range. ***Now available in a complete range of popular hunting cartridges, and coming soon in 224 Valkyrie, 350 Legend and 450 Bushmaster.***

BARNES TSX

We've brought back this proven all-copper hollow point. The Barnes® TSX® groups tightly and delivers consistent, deep penetration. The monolithic design retains nearly 100 percent of its weight, and its grooved shank minimizes barrel fouling and improves accuracy.

BERGER HYBRID HUNTER

The profile of a match bullet. The versatility of a traditional hunting projectile. Berger® Hybrid Hunter bullet weights have been fine-tuned to provide exceptional accuracy through factory rifles. Ballistic coefficients exceed those of comparable designs thanks to a hybrid nose design that combines tangent and secant ogive features.

SIERRA GAMEKING

Accuracy is built into every aspect of the Sierra® GameKing®. The bullet's boat-tail design flattens its trajectory, while the jacketed lead core delivers rapid expansion and energy release. It's an excellent bullet choice for virtually any medium game species in North America.

NON-TYPICAL NEW

Hunt whitetails with ammunition that's just as exceptional as they are. Non-Typical™ uses an optimized soft-point bullet with a concentric jacket to provide tag-punching accuracy and consistent, lethal wound channels on any deer. ***Now available in 7mm-08 Rem.***

FUSION NEW

Fusion® was the first rifle ammunition specifically built for deer hunting and it's still the best, offering the largest expansion and highest weight retention in head-to-head comparisons against the competition. Its concentric jacket is molecularly bonded to the lead core for superior accuracy and terminal performance. ***Now available in 6.5 PRC.***

FUSION MSR

The modern sporting rifle is a highly adapted hunting machine, and it needs ammunition that's just as customized. From primer to projectile, virtually every component is optimized for use in MSR platforms and peak ballistic performance through short barrels.

POWER-SHOK

The only tag these loads won't fill is the price tag. The jacketed lead-core bullets in Power-Shok® rifle loads fly straight and knock down a wide variety of medium and big game. ***Available in the widest selection of loads.***

POWER-SHOK COPPER

Practical hunters trust Power-Shok® rifle ammunition to fill freezers. Power-Shok Copper provides that same consistency and value, yet with a hollow-point, copper-alloy bullet that creates large wound channels.
