

EDGE TLR®

THE ONLY ONE WITHOUT A DOUBT

Edge TLR takes the features of high ballistic coefficient competition bullets and combines them with the industry's finest bonding technology to give hunters the best of both worlds. It uses the exclusive hollow-core Slipstream™ polymer tip to initiate expansion at extreme distances, while at close range, the bullet's copper shank and bonded lead core retain weight for consistent, lethal penetration. This means unrivaled terminal performance over the largest velocity window. Combined with the highest ballistic coefficients in its class, Edge TLR is the ultimate hunting bullet.

TECHNOLOGIES

- Slipstream Polymer Tip*
- Most Heat-Resistant Tip Material
- Extremely High Ballistic Coefficients
- AccuChannel Groove Technology
- Specially Formulated Propellant
- Gold Medal® Match Primer
- Nickel-Plated Brass
- *patent pending

NO.1 IN RIFLE AMMUNITION

NEW!

Expansion Redefined: Lethal extreme-range bullet performance doesn't look like the 2x expansion hunters see at conventional distances—it's not supposed to. With petals that open instantly and peel back uniformly every time, the Edge TLR transfers more energy to the animal on impact and carves straight, deadly wound channels.

NOW AVAILABLE AS A **COMPONENT BULLET**

See page 82

Edge TLR in 308 w/ 175 Grain Rocks!

"I used the Edge TLR to drop a 228-pound black bear in New Brunswick, Canada! The bear took two strides and dropped less than 20 yards from where it was hit! This is fantastic ammo and I will continue to use it!"

✓ **Yes, I recommend this product.**

RATINGS & REVIEWS

We make it easy to review ammunition online and check out the ratings of others. Go to federalpremium.com.

1,200-YARD PERFORMANCE

The Edge TLR's Slipstream polymer tip ensures proper expansion during low-velocity impact at extreme distances. In this ballistics gel block, shot at 1,200-yard velocity with P300WETLR200, you can see where the Slipstream tip has initiated expansion and separated from the bullet immediately after entering the block, exactly as designed.

Penetration: Deep
Weight Retention: Maximum

Expansion: Controlled
Range: Maximum

SLIPSTREAM'S SECRET

The Slipstream tip provides a perfectly aerodynamic meplat, yet initiates expansion at 200 fps lower velocities than comparable bullets. The secret is its hollow core, which is exposed when the tip breaks off on impact, allowing target material into the bullet nose.

BIG GAME • MEDIUM GAME • EXTREME RANGE

ALSO TRY

TROPHY BONDED TIP
See page 10

Combine bonded construction and a bone-crushing shank with a boat-tail design and polymer tip.

TROPHY BONDED[®] TIP

SURGICAL ACCURACY. TERMINAL RESULTS.

The Trophy Bonded Tip combines bonded construction and a bone-crushing solid copper shank with a boat-tail design and polymer tip that tighten groups. The resulting toughness and accuracy make it a perfect choice for the full spectrum of big game at any practical range.

TECHNOLOGIES

- Most Heat-Resistant Polymer Tip
- Copper Shank And Robust Bonded Construction
- Skived Hollow Point
- Gold Medal[®] Primer
- Specially Formulated Propellant
- Nickel-Plated Brass & Bullet

NO. 1 IN RIFLE AMMUNITION

TOUGHNESS MEETS ACCURACY

Some heavily built bullets trade accuracy for toughness. Not Trophy Bonded Tip. Its solid copper core and bonded jacket provide the deep penetration and terminal performance of a heavy-duty bullet, while its grooved shank, polymer tip and boat-tail design give it the accuracy of a match bullet.

Nickel plated for easy extraction and corrosion protection

Specially formulated propellant

Gold Medal primer

Exterior skiving for optimum expansion

Nickel-plated bullet

Grooved shank minimizes fouling and improves accuracy

Robust bonding maximizes weight retention

Solid shank for bone-crushing penetration

High-performance polymer tip and boat-tail design for flat trajectory, better accuracy and more energy

NOW AVAILABLE AS A
COMPONENT BULLET
See page 82

Two 6x6 Bulls Fall To Trophy Bonded Tip

"My hunting buddy and I harvested two nice, big 6x6 bulls with these bullets. The performance was outstanding, as both bulls went less than 50 yards after being hit..."

✓ Yes, I recommend this product.

TROPHY[®] COPPER

COMPLETE PERFORMANCE. TOTAL COPPER.

Deep penetration through even the toughest hide and bone. Perfect, consistent expansion at close or long range. Up to 99 percent weight retention and match-grade accuracy. Trophy Copper offers everything you demand in a big game cartridge—all with a copper, polymer-tipped bullet.

TECHNOLOGIES

- Lead-Free Copper Bullet
- Polymer Tip
- Grooved Shank
- Gold Medal[®] Primer
- Specially Formulated Propellant
- Nickel-Plated Brass

NO. 1 IN RIFLE AMMUNITION

ONE PIECE, ALL PERFORMANCE

Thanks to skiving in the nose, the monolithic Trophy Copper bullet expands reliably across a wide range of velocities and through both tough big game and lightly built medium game. This yields a larger expanded diameter than many copper bullets, with superb low-velocity terminal performance.

NEW!

Nickel plated for easy extraction and corrosion protection

Specially formulated propellant with copper-reducing additives

Gold Medal primer

Grooved bullet shank decreases fouling and improves accuracy

Copper-alloy construction for up to 99 percent weight retention

Tipped, skived bullet cavity ensures consistent expansion

High-performance polymer tip and boat-tail design for a flat trajectory and match-grade accuracy

★★★★★

Accurate!

"My Arizona elk hunt ended an hour into opening morning. The bull at 430 yards dropped instantly with one 165 grain Trophy Copper bullet ... One word. Outstanding!"

✓ **Yes, I recommend this product.**

RATINGS & REVIEWS

We make it easy to review ammunition online and check out the ratings of others. Go to federalpremium.com.

PENETRATION, POWER, PERFORMANCE

Weight retention as high as 99 percent allows the Trophy Copper bullet to penetrate deeply, while still expanding aggressively. Gelatin shot with 165-grain 30-06 Spring. Trophy Copper (P3006TC2) at 100 yards.

Penetration: Deep
Weight Retention: Maximum

Expansion: Moderate/Controlled
Range: Long

BARNES® TRIPLE-SHOCK® X

RETURN OF THE COPPER KING

We've brought back the immensely popular Barnes Triple-Shock X. This proven all-copper hollow point groups tightly at long range and delivers consistent, deep penetration. The monolithic design retains nearly 100 percent of its weight on impact to penetrate deep, and its grooved shank minimizes barrel fouling and improves accuracy.

BIG GAME • MEDIUM GAME • LONG RANGE

ALSO TRY
TROPHY® COPPER
See page 12

Get up to 99 percent weight retention and match-grade accuracy—all with a copper, polymer-tipped bullet.

NO. 1 IN RIFLE AMMUNITION

EMPTY NOSE, FULL TAGS

A deep hollow point cavity ensures the Barnes TSX expands to lethal diameters at any practical range. Gelatin shot with 180-grain 30-06 Spring. Barnes TSX (P3006AE) at 100 yards.

Penetration: Deep
Weight Retention: Maximum

Expansion: Moderate/Controlled
Range: Long

CLEAN & MEAN

The TSX uses a monolithic all-copper design to hang onto nearly all of its mass on impact. Its grooving cuts down on fouling and produces better accuracy across the full spectrum of rifles.

PARTNER SPOTLIGHT: Rocky Mountain Elk Foundation

NOSLER® PARTITION®

GIVING BIG STUFF BIG PROBLEMS SINCE 1977

The Nosler Partition was the first bullet we loaded in the Premium® line, and it continues to be a standard for consistency and reliability. Its partitioned lead core allows the front half of the bullet to mushroom quickly on impact, but keeps the back half intact for deep penetration.

ALSO TRY

TROPHY BONDED®
BEAR CLAW®
See page 26

A bonded jacket and core retain more than 95 percent of the bullet's weight for deep penetration.

Partitioned lead core
Front half mushrooms producing rapid expansion and energy release
Back half remains intact, retaining weight and ensuring deep penetration

Nickel-plated brass

Specially formulated propellant

Gold Medal primer

NO. 1 IN RIFLE AMMUNITION

BONE BUSTER

The Nosler Partition's time-tested design is tough enough to blast through the toughest tissue, while still creating massive wound channels. Bone-in gelatin shot with 165-grain 30-06 Spring. Nosler Partition (P3006AD) at 100 yards.

Penetration: Deep
Weight Retention: Moderate

Expansion: High/Controlled
Range: Medium

LETHAL TO THE CORE

The front half of the Nosler Partition expands to deliver energy to whatever it hits, while the rear core stays together to keep pushing the bullet deep. The two are separated by a copper-alloy partition.

Performance

"Your target will not wander off after taking a hit from this load, I would think any game within 350 yards is in the freezer."

✓ Yes, I recommend this product.

See page 83

BEAR ATTACK

Although the rear core of the Trophy Bonded Bear Claw stays intact on impact, the nose upsets aggressively for large wound channels. Gel shot with 300-grain 375 H&H Magnum (P375T1) at 100 yards.

Penetration: Deep
Weight Retention: Maximum

Expansion: High/Controlled
Range: Medium

Best Ammunition Available

"I used this for black bear in Manitoba...1 shot, complete penetration quartering away... Bear folded immediately and barely wiggled! Very pleased with this load."

Yes, I recommend this product.

BIG GAME • SAFARI • MEDIUM RANGE

ALSO TRY

NOSLER® PARTITION®
See page 27

A partitioned lead core allows the front half of the bullet to expand, but keeps the back intact for deep penetration.

27

GET FULL BALLISTICS ON PAGES 94-107.

ALSO TRY

TROPHY BONDED®
BEAR CLAW®
See page 26

A bonded jacket and core retain more than 95 percent of the bullet's weight for deep penetration.

SWIFT® A-FRAME®

TURNING THE TABLES ON DANGEROUS GAME

Those who hunt game that hunts back trust their lives to the Swift A-Frame. Its bonded front core and progressively tapered jacket produce controlled expansion and energy release. The design eventually stops expansion and maintains a longer shank for deep penetration.

NO. 1 IN RIFLE AMMUNITION

CONTROL FREAK

The progressively tapered jacket and bonded construction in the nose of the Swift A-Frame controls expansion on tough game, for an extremely efficient energy transfer within the animal. Gelatin shot with 300-grain 375 H&H Magnum (P375SA) at 100 yards.

Penetration: Deep
Weight Retention: Maximum

Expansion: High/Controlled
Range: Medium

DIVIDE AND CONQUER

The divided design of the Swift A-Frame allows the front of the bullet to expand considerably, but halts it halfway down the bullet shank, keeping the rear intact for deep penetration on large game.

TECHNOLOGIES

- A-Frame Jacket
- Gold Medal® Primer
- Specially Formulated Propellant
- Nickel-Plated Brass

TROPHY BONDED SLEDGEHAMMER® SOLID

NOTHING STOPS IT, SO IT CAN STOP ANYTHING

Jack Carter's legendary Trophy Bonded Sledgehammer Solid bonds the core to a thick brass jacket to achieve bone-crushing penetration. Its flat nose minimizes deflection for a straight, deep wound cavity, and the grooved shank improves accuracy across an array of rifle platforms.

TECHNOLOGIES

- Bonded Brass Jacket
- Gold Medal® Primer
- Specially Formulated Propellant
- Nickel-Plated Brass

NO. 1 IN RIFLE AMMUNITION

FLAT-OUT DEVASTATING

The flat nose of the Trophy Bonded Sledgehammer Solid minimizes deflection off bone, keeping the bullet driving deep, and carving straight, lethal wound channels.

NOW AVAILABLE AS A
COMPONENT BULLET
See page 83

DESTROYS EVERYTHING EXCEPT YOUR NERVE

The Trophy Bonded Sledgehammer Solid's thick brass jacket prevents deformation on impact for deep penetration and 99 percent weight retention. Gelatin shot with 300-grain 375 H&H Magnum (P375T2) at 100 yards.

Penetration: Maximum
Weight Retention: Maximum

Expansion: None
Range: Medium

ALSO TRY

WOODLEIGH™
HYDRO SOLID
See page 32

A unique nose design produces the same penetration of traditional solids with a larger wound channel.

31

ALSO TRY

TROPHY BONDED®
SLEDGEHAMMER® SOLID
See page 30

A lead core bonded to a thick bronze jacket achieves bone-crushing penetration and straight wound cavities.

WOODLEIGH™ HYDRO SOLID

SHOCKING TERMINAL PERFORMANCE

Hunters who target dangerous game have always relied on solid, non-expanding bullets that blow through bone and thick hide. The Woodleigh Hydro Solid offers that same unstoppable penetration while also creating a massive wound channel and transferring more energy to the target.

BLASTING CAP

The Woodleigh Hydro Solid's polymer cap disintegrates on impact, exposing a concave nose and flared pressure ring. It creates a larger wound cavity than traditional solids.

TECHNOLOGIES

- Polymer Cap
- Concave Nose
- Flared Pressure Ring
- Gold Medal® Primer
- Specially Formulated Propellant
- Nickel-Plated Brass

Amazing Performance On Cape Buffalo

"...Very large wound cavity. The hole in the heart looked to be more than twice the caliber size. The recovered round looked like it could be reloaded."

Yes, I recommend this product.

RATINGS & REVIEWS

NO. 1 IN RIFLE AMMUNITION

DOUBLE THE TROUBLE

The exclusive design of the Woodleigh Hydro Solid allows it to transfer more energy to the target, resulting in a wound channel that's approximately twice the size of standard solids. Top gelatin shot with 300-grain 375 H&H Magnum Woodleigh Hydro Solid (P375WH) at 100 yards; bottom gelatin shot with a 300-grain 375 H&H Magnum conventional solid.

Woodleigh Hydro Solid

Conventional Solid

Polymer nose cap ensures reliable feeding

Concave nose and flared pressure ring produce larger wound cavities

Solid copper-alloy bullet offers almost 100 percent weight retention

Grooved shank improves accuracy

Nickel-plated brass case for easy extraction

Specially formulated propellant

Gold Medal primer
