

NEW!

DEER • MEDIUM GAME

FUSION[®]

DROP DEAD LEAD

With a molecularly fused jacket and a pressure-formed core that provides deep penetration and stopping power, Fusion delivers best-in-class weight retention and expansion to transfer maximum energy on target. Available in Fusion Rifle, Handgun and MSR, including all-new 450 Bushmaster.

NOW AVAILABLE AS A
COMPONENT BULLET

See page 85

Internally skived bullet for consistent expansion

Molecularly-fused jacket around a pressure-formed core

Boat-tail design for a high ballistic coefficient and improved accuracy

Federal[®] brass case features a harder case head for exceptional primer retention

Extremely reliable primer

FUSION RIFLE

Fusion was the first rifle ammunition specifically built for deer hunting—and it's still the best, offering the largest expansion and highest weight retention in head-to-head comparisons of F3006FS1 and leading deer hunting rifle ammunition of the same bullet weight.*

*Three-shot averages fired into bare 10 percent ballistic gelatin at 100 yards through a 22-inch barrel.

Gelatin shot with 165-grain 30-06 Spring, Fusion (F3006FS2) at 100 yards.

FUSION MSR

The modern sporting rifle isn't just some gun. It's a highly adapted hunting machine, and it needs ammunition that's just as customized: Fusion MSR. From primer to projectile, virtually every component is optimized for use in modern sporting rifles and peak ballistic performance through short barrels.

FUSION HANDGUN

Fusion Handgun bullets feature the same molecularly fused construction as their rifle counterparts for the toughness, accuracy and terminal performance short-barrel hunters need. The loads' bullet weights and velocities have also been optimized to be lethal on deer without punishing the shooter.
