

TROPHY BONDED® 10MM AUTO

FULL POWER— AND ABOUT TIME

While most 10mm Auto ammunition is watered down to produce ballistics similar to those of the 40 S&W, our Trophy Bonded Jacketed Soft Point load is a full-power offering with the muscle needed for big game hunting.

TECHNOLOGIES

- Specially Formulated Propellant
- Nickel-Plated Brass
- Renowned Federal® Primer
- Trophy Bonded Bullet Design

INNER STRENGTH

By forming the inner profile of the bullet's heavy jacket, Federal Premium engineers gave the Trophy Bonded JSP controlled expansion on a variety of big game.

THE POWER OF 10

The heavy jacket of the Trophy Bonded JSP is bonded to the lead core, ensuring high weight retention and deep penetration. Gelatin shot with 180-grain 10mm Auto Trophy Bonded® JSP (P10T1) from a Glock 20 at 20 yards.

Penetration: Moderate
Weight Retention: High

Expansion: Moderate
Range: Medium

OUTSTANDING KNOCKDOWN!

"Three days into to the season a 6 point buck walked out in front of my stand about 25 yards. I lined up my sights behind the shoulder and squeezed the trigger. The buck jumped straight up in the air, took about two steps and dropped like a rock. Amazing round!"

Yes, I recommend this product.

RATINGS & REVIEWS

We make it easy to review ammunition online and check out the ratings of others. Go to federalpremium.com.

ALSO TRY

SWIFT® A-FRAME®
See page 48

A bonded jacket and core retain more than 95 percent of the bullet's weight for deep penetration.

SWIFT® A-FRAME®

LONG PERFORMANCE THROUGH SHORT BARRELS

Get robust, proven on-game handgun performance with the Swift A-Frame. The rounds offer outstanding accuracy, as well as high weight retention and controlled expansion on big game.

ALSO TRY

FUSION®
See page 87

Harness the power of molecularly fused construction for the toughness, accuracy and terminal performance short-barrel hunters need.

49

EXPANSION STOPS— THE BULLET KEEPS GOING

The Swift A-Frame's cross member stops expansion, and the retained core maintains weight and extends penetration.

COPPER OPTION

Get almost 100 percent weight retention and moderate penetration in a monolithic copper bullet with our Barnes® Expander® handgun loads.

The design ensures peak performance for hunters who crave the challenge of handgun hunting.

TECHNOLOGIES

Specially Formulated Propellant
Nickel-Plated Brass

Bonded front half expands consistently across a broad velocity range

Expansion-arresting A-frame design

Back half remains intact for deep penetration

Nickel-plated case prevents corrosion and helps extraction

Specially formulated propellant

Unique Federal primer

A IS FOR AWESOME

The A-Frame bullet design allows the front half of the bullet to expand aggressively, which leads to large, lethal wound channels. Gelatin shot with 325-grain 500 S&W Swift A-Frame (P500SA) from a Smith & Wesson X-Frame at 25 yards.

Penetration: Moderate
Weight Retention: High

Expansion: Moderate
Range: Medium

Nice Round

"I recently took a whitetail with the Swift A-Frame. It had good knockdown—the deer dropped within 20 yards."

✓ Yes, I recommend this product.
